

I chose "Soccer Database" as dataset to perform analysis on

- And I have made up some hypothetical questions to find answers for:

1. Best rated players
2. Best potential rated players
3. Tallest players
4. Shortest players
5. Oldest players
6. Youngest players
7. Players with most appearances
8. Team scored most goals
9. Total number of goals for each season
10. Total number of goals for each League
11. Relation between home and away wins
12. Team with most wins
13. Team with most home wins
14. Team with most away wins
15. What team attributes lead to the most victories?
16. What teams improved the most over the time period?

All documentations of data wranglings, statistics, and plots are found in the provided (.ipynb) files
